[Alert Technicians](#)

1

Message shows when location is under alert.

2

Table is limited to 10 records at a time, ordered by time, with pagination at top and bottom. Pagination in either direction is disabled when the first or last record is reached.

3

Molecular formulae are expanded to common name in a tooltip on hover: CHCl₃ - Chloroform, CHBr₃ - Bromoform, CHBrCl₂ - Bromodichloromethane, CBr₂Cl₂ - Dibromochloromethane.

4

Rows are highlighted according to the total amount of all contaminants in the record. Yellow - over 0.0400, red - over 0.0800.

5

The first row below 0.0400 after a yellow or red should be colored green.

6

An alert icon is shown for each record at a time when the facility was under alert.

7

An “Alert Technicians” action button is enabled only when the facility is not currently under alert and the latest record is in a yellow or red state.
